

Connecting at the speed of life™

Internet Transit Services... reliable, high-speed Internet connectivity

The Internet is recognized as one of the most powerful tools available to businesses and consumers today. How can you maximize its potential for your organization? It's easy with high-speed, high-bandwidth Internet Transit from Hydro One Telecom.

Operating on an extensive province-wide, self-healing fibre optic network connected to several recognized Tier 1 Network Service Providers, Hydro One Telecom can provide a full range of connectivity options and access speeds to help your business or organization fully realize the benefits of the Internet. Whether you are a high-volume user such as a regional or local Internet Service Provider, a community network such as school boards and hospitals, or medium to large-sized businesses, look to Hydro One Telecom for the Internet connectivity solutions your organization needs.

Flexible, cost-effective solutions

For cost-effective solutions, you want the best match of Internet Transit Services with your organization's Internet connectivity requirements. At Hydro One Telecom, we offer a family of Internet Transit Services to provide for flexible solutions that can evolve with your Internet connectivity needs.

As your needs change, we can offer timely modifications to your service, which in most cases is within five working days -- on average, bandwidth can be upgraded in four hours.

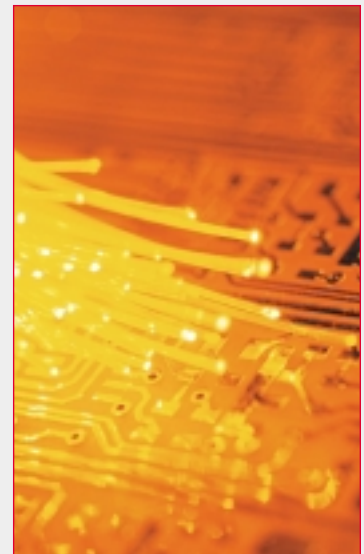

High-speed, high volume

Speed is of the essence in today's wired world and delivering high-speed, high-volume Internet transport is a key service offering from Hydro One Telecom. Employing the latest in technology -- Asynchronous Transport Method (ATM), Synchronous Optical Networking (SONET), and Dense Wave Division Multiplexing (DWDM), we can provide you with:

- Internet access interfaces at 2, 10, 100 and 1000 Mbps
- Internet bandwidth in 1 Mbps increments.

And because our service runs on Hydro One's province-wide network of transmission towers, we can provide high-speed service to many locations not serviced by other high-speed Internet-connectivity providers.

Fully realize
the power of the Internet
with cost-effective
high-speed connections

Maximize the Internet's potential
for your organization with high-speed, high-bandwidth
Internet Transit from Hydro One Telecom

Hydro One Telecom

Connecting at the speed of life™

Superior reliability

With Hydro One Telecom, you can be assured of reliable high-speed Internet connectivity. Through our above-ground fibre-optic network, we offer a diverse alternative for Internet connectivity, ideal for redundancy planning and disaster recovery. The service you select is managed by the same award-winning Network Operations Centre that oversees data transmission for Ontario's electricity grid — providing you with around-the-clock monitoring and support. And our Internet traffic transversing the network performs within our established service parameters:

- End-to-end network availability of 99.7% over a 30-day period
- Latency on the Hydro One Telecom backbone (between core routers) of less than 65 milliseconds
- Mean time to repair of four hours.

With service standards that are among the highest in the industry and the stability that comes from being a wholly-owned subsidiary of Hydro One, you can be confident that Hydro One Telecom can deliver the high-speed Internet connectivity your organization needs.

To learn more about high-speed, high-volume Internet connectivity through flexible, cost-effective solutions, ask about Internet Transit Services available through Hydro One Telecom.

Your high-speed Internet connections are monitored by Hydro One's award-winning Network Operations Centre.
