

Connecting at the speed of life™

Private Line Services... **totally secure, totally reliable**

When your organization needs connections of the highest quality, look to Private Line Services from Hydro One Telecom. Whether you are routinely transferring large files, planning for disaster recovery or need to facilitate high-performance computing, our dedicated, point-to-point connections between two locations can provide you with the quality and reliability that your organization requires.

High bandwidth capacity

With bandwidth of up to 10 Gbps and speeds of DS-3 and OC-3 through OC-192, Hydro One Telecom Private Line Services provides the capacity and speed required for timely transfer of large files. Data-rich applications such as multimedia, education, scientific computing, medical imaging, disaster recovery and mainframe backup are easily accommodated with a highly secure, private line for your organization's exclusive use.

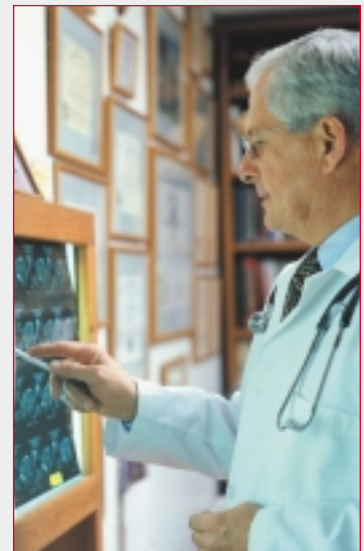

Dedicated line for complete security

For mission-critical telecommunications, sensitive information and confidential data, you want to be assured of complete data security. With a dedicated connection between locations, you can be confident that only data from your organization is transmitted and that you have sole access.

A network built for reliability

Initially developed to protect and control Hydro One's electricity grid, our end-to-end optical network uses SONET self-healing rings for enhanced reliability. Monitored by the same award-winning Network and Operations Centre that ensures the reliability of Ontario's electricity grid, our Private Line Services are ideal for mission-critical applications. And Hydro One Telecom's Service Level Agreements are your assurance of our high standard of reliability -- 99.99% network availability based on 30 days of performance and a mean time to repair of four hours.

Hydro One Telecom

Best solution for disaster recovery

Hydro One Telecom's fibre-optic network is carried above ground on Hydro One's transmission towers providing a diverse alternative to incumbent carriers and it is perfectly suited for disaster recovery and redundancy applications. In combination with the security, reliability and high bandwidth available through Private Line Services, Hydro One Telecom has everything required for high-capacity disaster recovery services.

Flexible options and pricing

With Hydro One Telecom's Private Line Services, you have a range of choices. Circuits are available in a variety of bandwidths -- DS-3, OC-3, OC-12, OC-48, OC-192, allowing you to choose the speed most appropriate for your application. And you have the option of protected circuits, further enhancing reliability and reducing repair time.

In addition, we can offer flexible pricing and discount plans tailored to your organization's requirements, ensuring our telecommunications solutions are cost effective.

Why choose Hydro One Telecom for Private Line Services?

When you're looking for a private line provider, you want to be assured that the service you select is totally secure and totally reliable, and that you have the options and pricing flexibility your organization requires. Hydro One Telecom offers all of these advantages, and the strength and stability that comes from being a subsidiary of Hydro One, Ontario's largest distributor of electricity.

To learn more about high-speed point-to-point connections of the highest quality, ask for Private Line Services available through Hydro One Telecom.

Unlike incumbent carriers, Hydro One Telecom's fibre optic network runs on transmission towers.
